

SCALE 1: FEAR

SCALE SCORE: /35

INSTRUCTIONS:

Each item should be answered to the best of your ability. If a particular situation/behavior is never observed, a "N/A" response is appropriate.

Scores for each scale can be calculated by summing the items within a given scale. It is not meaningful to add together scores from individual scales (i.e. create a "total" score).

Dogs often show signs of anxiety or fear when exposed to particular sounds, objects, persons or situations —e.g. crouching or cringing with tail tucked between the legs; whimpering or whining, freezing, trembling, or attempting to escape or hide.

Using the following 5-point scale (1 = No fear, 5 = Extreme fear), please indicate this dog's recent tendency to display fearful behavior in the following circumstances:

QUESTIONS:

RATING SCALE:

No visible signs of fear	Avoiding eye contact, avoidance of the feared object	Crouching or cringing with tail lowered or tucked between the legs	Whimpering and whining, freezing, shaking or trembling	Vigorous attempts to escape, retreat or hide from the feared object	Not observed/ Not applicable
--------------------------	--	--	--	---	---------------------------------

1 2 3 4 5 0

When an unfamiliar person (to the dog) tries to touch or pet this dog

In response to sudden or loud noises (e.g. car backfire, road drills, objects being dropped, etc.)

When a familiar person returns to the kennel

In response to strange or unfamiliar objects while on-leash (e.g. plastic trash bags, leaves, litter, flags flapping, etc.)

When entering their kennel for the first time

When approached by an unfamiliar dog on-leash

When barked, growled or lunged at by an unfamiliar dog when being walked on leash

SCALE 2: AROUSAL

SCALE SCORE: /30

The following questions are designed to allow you to describe this dog's current behavior at your shelter. Please do not modify the content (no cherry-picking items from different factors or changing item wording) but feel free to choose one, multiple, or all five scales depending on which behavioral constructs you are interested in.

Each item should be answered to the best of your ability. If a particular situation/behavior is never observed, a "N/A" response is appropriate.

Scores for each scale can be calculated by summing the items within a given scale. It is not meaningful to add together scores from individual scales (i.e. create a "total" score).

Dogs display a wide range of behaviors in a variety of situations.

Using the following 5-point scale (1 = Never, 5 = Always), please indicate how often this dog in the recent past has shown any of the following behaviors:

QUESTIONS:

RATING SCALE:

Never

Seldom

Sometimes

Usually

Always

Not
observed/
